

Face Lift

Face, Neck and Upper or Lower Blepharoplasty (eye lid surgery)

A facelift will help erase the years by tightening the skin around your neck and face. It also removes deep creases especially around the nose and mouth that are common with aging. It results in a younger, fresher looking face with tighter skin tone that lasts 5 to 10 years.

This is a routine Face Lift (Face, Neck, and Upper or Lower Blepharoplasty) Procedure Package with 1 night length of stay in the surgical unit.

Patient Eligibility

The package is applicable for elective, uncomplicated patients. Patients with the following conditions are considered to be complex or high risk cases and will not qualify for the package:

- 🕒 Bleeding Disorders
- 🕒 Patients with underlying severe medical problems that required additional treatment and investigation including, but not limited to HIV and uncontrolled diabetes.

Your Consultation

Your physician consultation is very important, because it is the moment when you can discuss your medical issues face-to-face with your doctor. If you are traveling from overseas, this will be the first time you meet with your doctor so it critical that he/she understands:

- Your medical needs
- Your expectations
- Your medical history

Most people have a good idea of what the procedure or outcome they want ("I want smaller breasts"), and the physician's responsibility is to listen and then explain what can be done, the procedures or techniques to achieve your objectives, and the risks and costs involved.

You will have a lot of questions to ask, so preparation is key to make the most of your consultation. We suggest that you:

- Write your questions down to make sure you remember them
- Come with your medical history/survey already completed
- Bring any photos or visuals aids that will help explain what it is you want or expect from treatment

Please note that this information should be used only as a guide to your treatment. All specifics will be discussed with your Physician at your consultation.
